

Emmitt Plant

Universal Bingham AP400 Planer

The AP centre pivot patch planer improves performance with its centre pivot design applying the force directly over the cutting drum. This central mounting eliminates stress, instability and bouncing during operation. The unique front down design creates a barrier keeping cuttings inside the planer canopy. The service hatch allows easy safe pick changing with the planer on the floor, these characteristics along with the high torque low speed motors make this probably the most productive patch planer on the market today.

Specification	AP 400
Cutting Depth (mm)	120/150
Cutting Width (mm)	400
Tilt Capability	15 Deg
Side Shift (mm)	800
Approx Shipping Weight (Kg)	780
Minimum HYD HP recommended	32
Maximum HYD HP recommended	55
Flow Requirement	ST/HF
