ABOUT US

Established in 1979, Emmitt Plant is one of the largest privately owned plant hire companies in the East of England with depots in Ipswich, Suffolk, Diss, Norfolk and Corby, Northamptonshire.

For over 30 years Emmitt Plant has provided the very highest levels of customer care to a diverse range of clients.

We currently run in excess of a thousand items of plant, from mini diggers to dumpers, rollers to compressors and of course telehandlers including the 16mtr 'Merlo 38.16 Roto' machines. The equipment is modern and backed by fully equipped workshops, spray shop facilities and stores.

Items of plant are expertly maintained and are backed up by a highly trained fleet of mobile service engineers, who travel to site in fully equipped vans. Our engineers are in constant contact with our service department at head office to enable quick response times to all site queries.

We also undertake contract and maintenance work, including on-site servicing, repairs and fabrication. All our engineers are CSCS card holders. Emmitt are HAE members, SafeHire & Chas accredited and we are also AVETTA (formerly known as PICS) approved.

T 01359 251220
F 01359 251284

Corby Depot

St James Road, Corby, Northants. NN18 8AL
T 01536 205030
F 01536 205036

HOW TO HIRE

You don't have to be a major contractor or a builder to hire from us. At Emmitt we welcome all trades, as well as members of the public.

Our company policy states that plant and tools can only be hired out by non account customers when covered by a deposit from a valid credit/debit card, which must be in the name of the hirer. Cash and cheques are not accepted.

Two forms of identification must be submitted confirming the hirers address (this must be the same address that the credit/debit card is registered to) together with a landline telephone number and mobile number.

A deposit of up to £500 per item hired plus hire fees will be taken from the hirers card before the hire commences. Hire charges will then be debited at the end of the first complete hire week and every Friday thereafter until the hire is completed. Deposits and overpayments will be credited on termination of hire. A visit to any of our branches is required before the hire can commence.

INSURANCE

The hirer is responsible for theft and damage to the machine(s) and should have adequate insurance to cover this.

All plant and tools, no matter how big or small cannot be supplied without Insurance.

Non account holders will be expected to provide "Hired-in Plant Insurance" alongside photographic ID and utility bills prior to hire.

Hireguard Insurance is available at point of hire from all depots. Further details available on request.

HIRE GUIDE
